UPDATED 13 NOVEMBER

## 1 – Infrastructure

*A well-developed broadband infrastructure is foundational to providing and enhancing the connectivity of a digitally enabled workforce.*

[Resources - Policy Guidance on Broadband](#)

*Access*

Question
To what extent does your economy provide household broadband and mobile internet access?
To what extent does your economy provide students with access to the Internet at school or at home? This could include affordable or low-income Internet services, either publicly or privately supported.
To what extent are efforts being made to distribute Internet-enabled devices (cell phones, PCs, laptops, tablets, etc) to students who do not have access to them, especially during the move to online learning?
To what extent does your economy support providing broadband/internet access to schools and faculty?
